

Project 1: Planning + Research

Angela Zhang

Concept : **Dual Time-Zone Clock**

Two clocks displayed side-by-side, showing PST and CST (China time): my time zone and my dad's time zone, respectively.

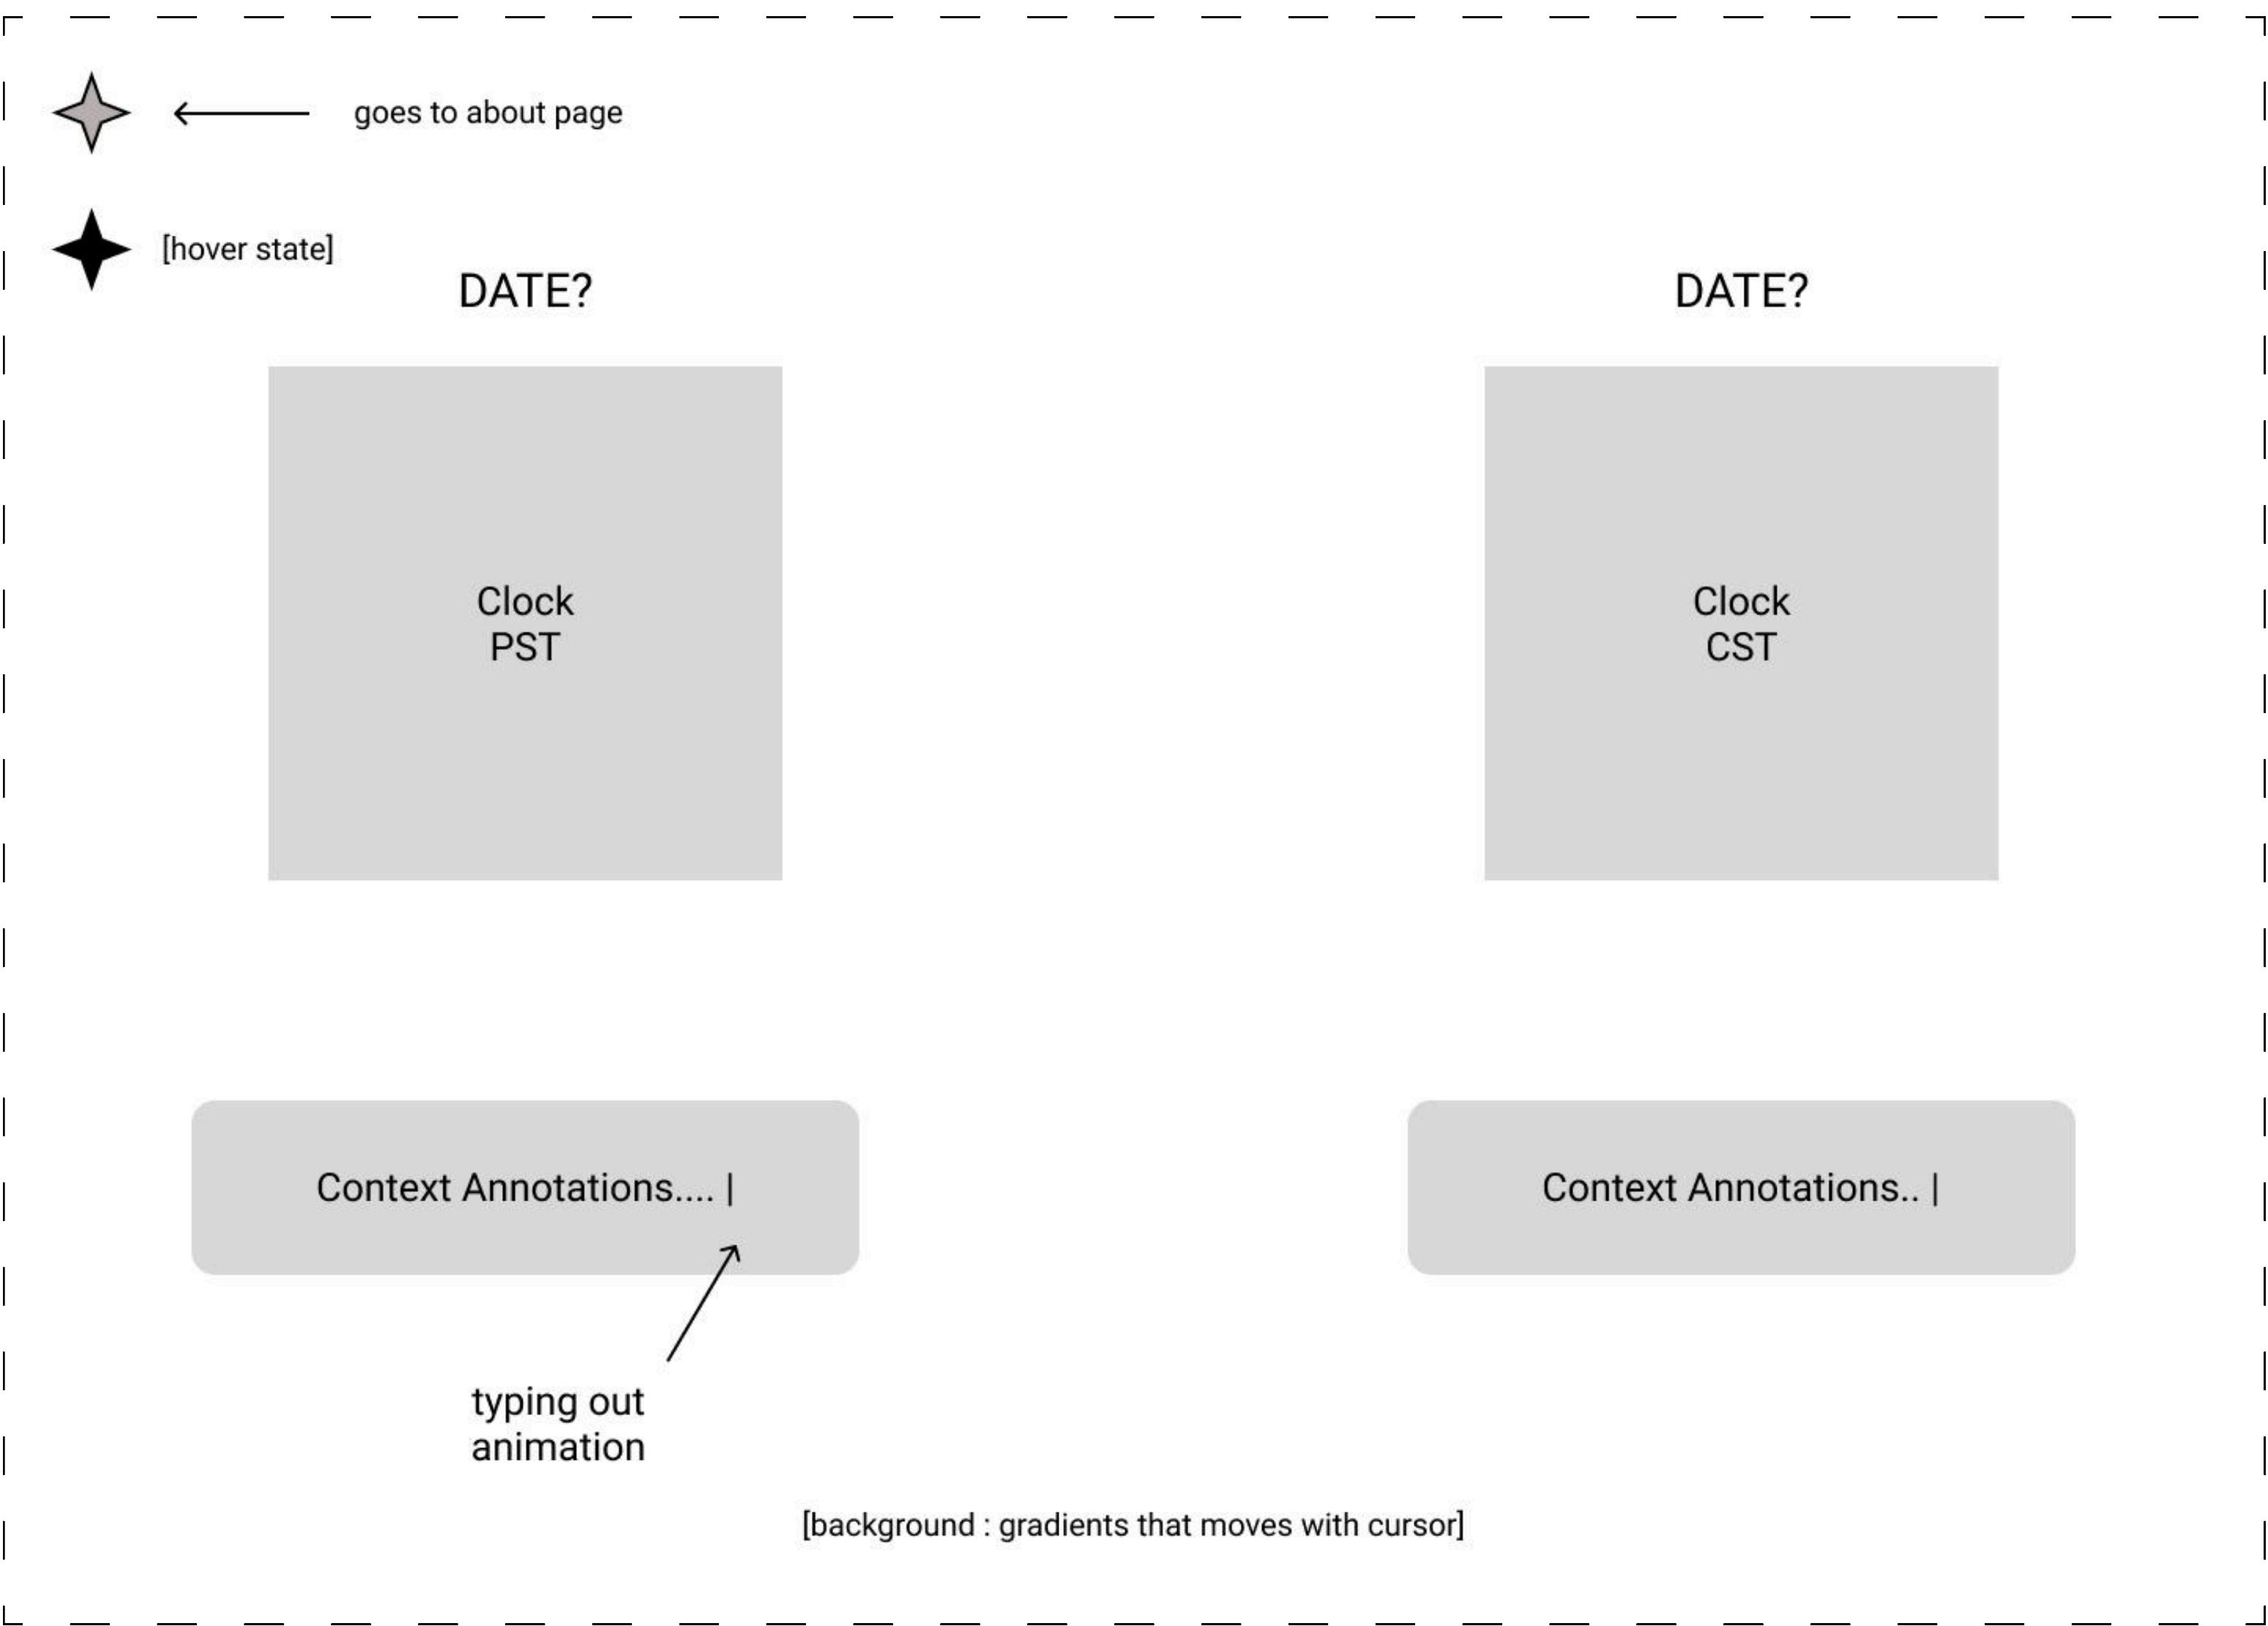

Functionality : Visualize the temporal gap

- The interface updates in real-time, reflecting each our local times
- Contextual annotations in the form on typing text (either pre-determined or live inputs)
 - highlight daily routines, helping to visualize the temporal gap and different activities

Desired Experience:

Gain a greater sense of connection and understanding across time zones, enhancing awareness of how loved ones' lives unfold simultaneously but differently.
